A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/23/09 has been entered.

Claims 34-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. Claim 34 recites "at least one compound as claimed in claim 33" but only one compound is claimed. Thus applicants' intent is not clear.
2. Claim 35 depends on a cancelled claim. It is presumed that "33" was really intended.

Claim 34 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claims recites salts and N-oxide of claim 33 which is only limited to the free base form.

Claim 35 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claim recites 2 uses which are correlated to diametric mechanisms of action-i.e. D3

Art Unit: 1624

antagonism vs D3 agonism. As only one compound is being claimed it cannot have both mechanisms of action and thus cannot be both useful for schizophrenia and Parkinson's Disease. Applicants need to show which property instant compound possesses and cancel remaining use to overcome this rejection.

Claims 33-35 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-19 and 22 of U.S. Patent No. 7,320,979 for reasons of record. Although the conflicting claims are not identical, they are not patentably distinct from each other because the species embraced herein is also embraced by the claims in the US patent which describes the same species as example 1 in the specification .
